OBJECTIVE

A position as a Quality Control Specialist

EDUCATION

Bachelor of Science in Physics, May 20XX
State University of New York College at Buffalo
GPA 3.7/4.0

Relevant Courses:

Heat and Thermodynamics
Electric Circuit Analysis
Nuclear Physics

Stress Analysis
Materials Management
Statistical Quality Control

RELATED EXPERIENCE

Intern, May-August 20XX

U.S. Nuclear Regulatory Commission, Rockville, Maryland

- Conducted tests and research for the Regulation and Assessment Team.
- Gathered information and prepared preliminary reports for audits of active reactors, in accordance with federal safety and performance standards.
- Compared data of previously filed reports to ensure accuracy and consistency.
- Contributed to the development of the final audit assessment report.

Sonar Technician, 20XX-20XX

U.S. Navy

- Used passive and active sonar systems to detect and classify targets.
- Supervised maintenance and repair of sonar systems and support units.
- Provided technical support for drydock installations and system certifications.
- Trained new operators.

TECHNICAL SKILLS

C++, Fortran, Pascal, Basic, Unix, VMS, Linux, Windows NT, Macintosh OS
Microsoft Office: Word, Excel, Access

AFFILIATIONS

Physics Club, Vice-President, 20XX-20XX
Society of Physics Students, Member, 20XX-20XX
Sigma Pi Sigma Honor Society
